

1. IDEAS

1. total sales of petroleum for each state

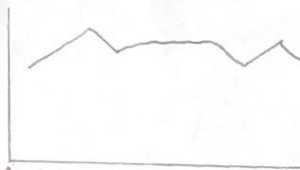

3. stock volume of products over time

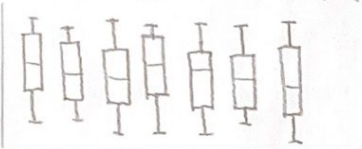

5. sales of petroleum over time

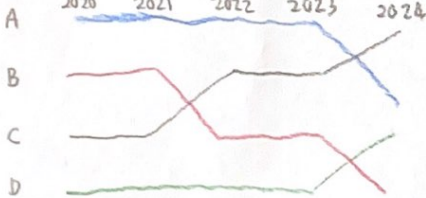

6. import value over time

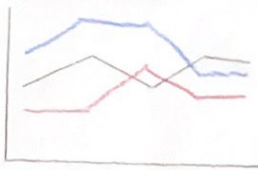

8. Australian fuel prices over time

9. petroleum production by basin over time

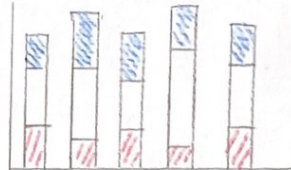

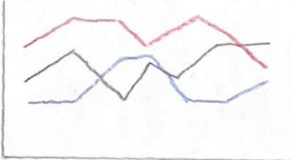

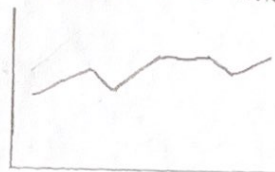

2. petroleum production over time

4. refinery production over time

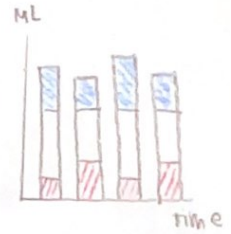

7. export volume over time

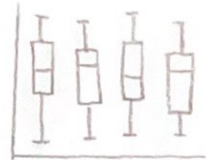

2. FILTER

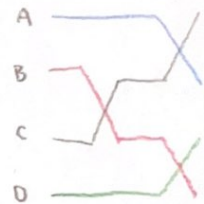

for 5, use stacked bar chart instead of bar chart to see in detail for each product and not overall

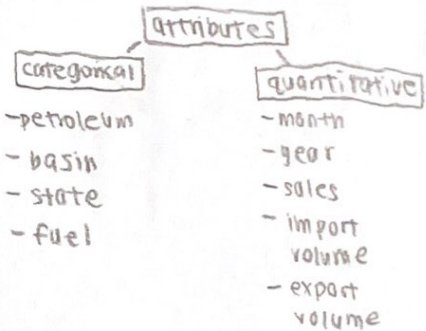

for 8, use box plot instead of multiple line chart as it shows more insights

for 9, use bump chart instead of multiple lines chart to show ranking / comparison

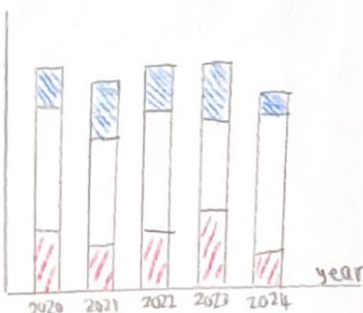

3. CATEGORISE

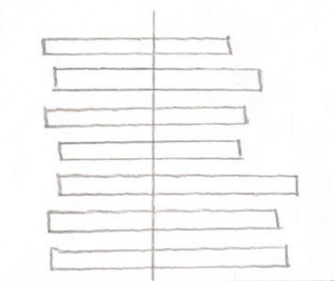

4. COMBINE AND REFINE

for 5, instead of sales by month from 2020-2024 change to sales by year 2020-2024

combine 6 & 7 to spine chart for better comparison between import & export

5. QUESTION

does this visualisation convey the data in a clear manner?

are all 9 visualisations useful & needed?

do they portray a meaningful story?

LAYOUT

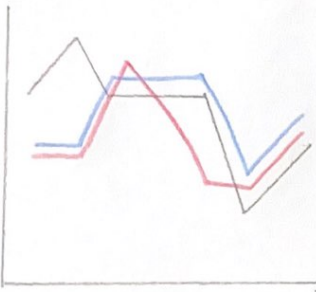

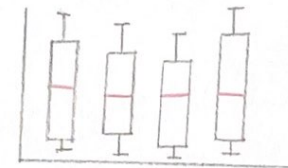

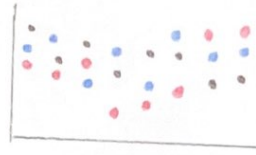

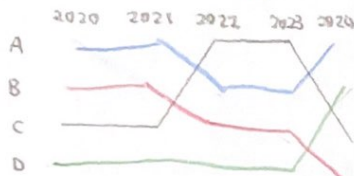

AUSTRALIA'S PETROLEUM

brief overview...

TITLE

interesting
insights...

TITLE: Australia's Petroleum

AUTHOR: Cheryl Chio Ee Xin

DATE: 24/09/2024

SHEET: 2

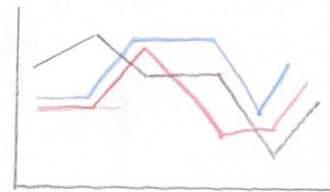

TASK: magazine style

OPERATION

1. hovering over a state in the map
will show information/insights

2. hovering over a line will highlight
the hovered on line for emphasis

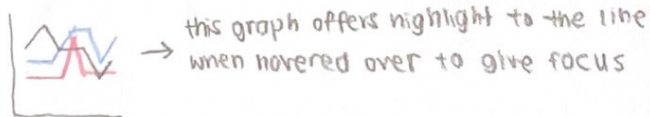

FOCUS

all graphs are equally important

main graph is map

all graphs are accompanied with detailed description

map gives informative
tooltip when hovered over

DISCUSSIONS

advantages:

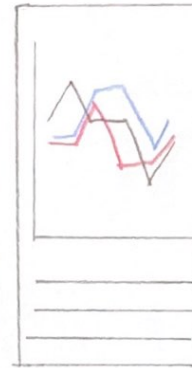

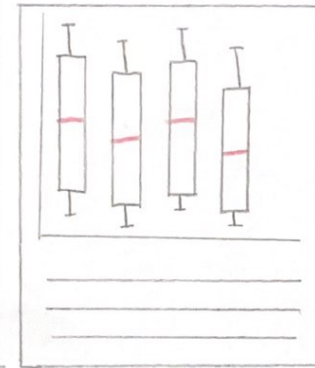

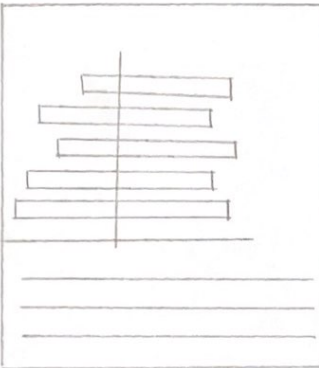

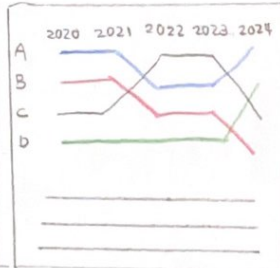

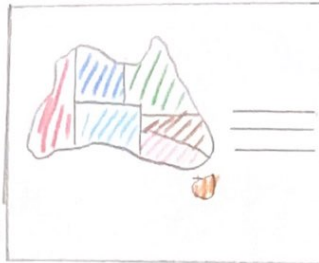

- informative
- clear flow
- tooltip provides user with interesting insights
- well organised structure

disadvantages:

- descriptions may be too lengthy/heavy

LAYOUT

Australia's Petroleum

TITLE: Australia's Petroleum

AUTHOR: Cheryl Chia Te Xin

DATE: 24/09/2024

SHEET: 3

TASK: Comic strip

OPERATION

1. hovering over a dot will show information about that point

Type: _____
year: _____
ML: _____

FOCUS

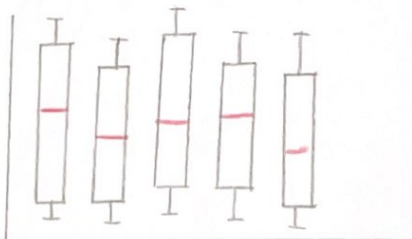

all graphs are equally important

graphs are accompanied with brief description

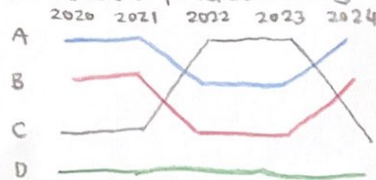

1. map focuses on total sales of petroleum for each state

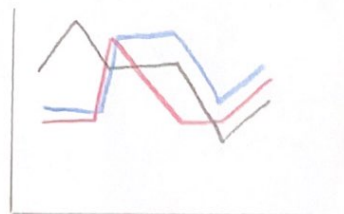

3. this box plot focuses on Australian fuel prices over time

2. this graph focuses of Petroleum production by basin

4. this chart focuses on the stock volume of products over time

DISCUSSIONS

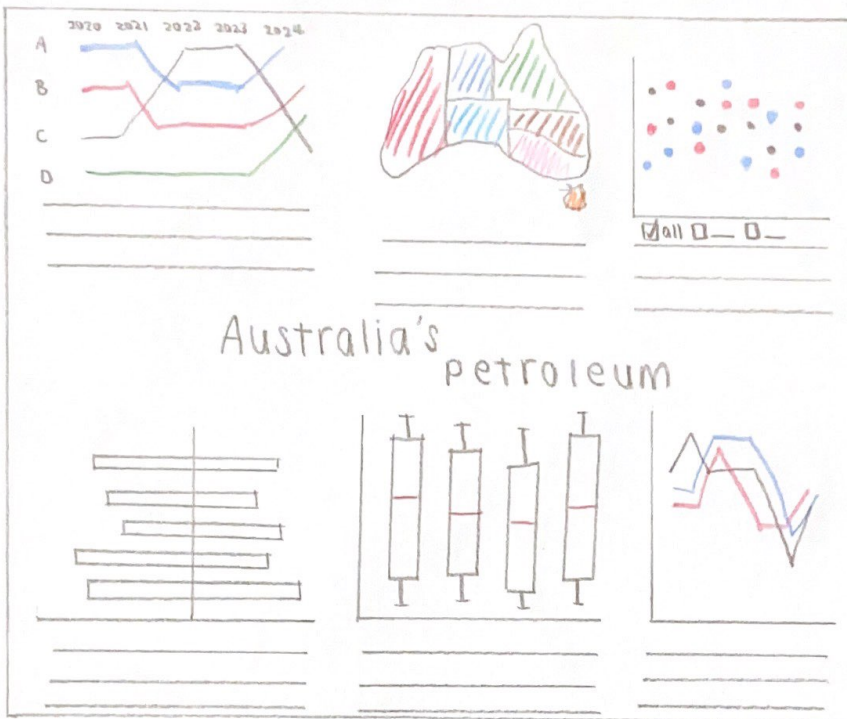

advantages:

- well segmented into clear sections

disadvantages:

- no clear flow
- too many information
- sections are too close to each other

LAYOUT

TITLE: Australia's petroleum

AUTHOR: chenyl chia Ee Xin

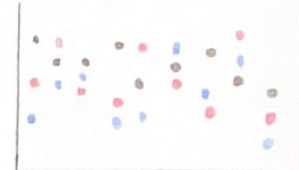

DATE: 24/09/2024

SHEET: 4

TASK: partitioned poster

OPERATION

1. allow filter of petroleum types so users can focus on a particular/ few types of petroleum

☒ all ☐ ☐

FOCUS

all graphs are equally important

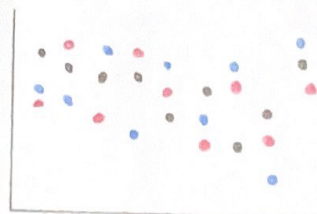

filter for graph gives focus to the fuel type you want to focus on

all graphs are provided with descriptions

1. map focuses on total sales of petroleum for each state

2. focus on the refinery production over time

☒ all ☐ ☐

DISCUSSIONS

advantages:

- aesthetic
- interesting layout

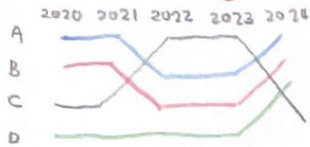

disadvantages:

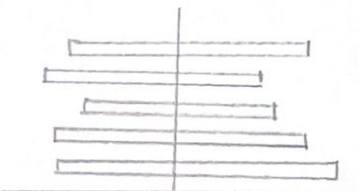

- no story flow
- visualisations placement feels unorganised and unkempt

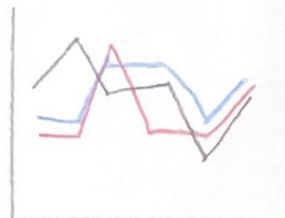

LAYOUT

Australia's Petroleum

brief overview...

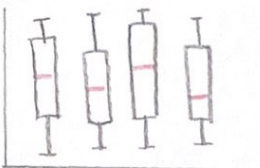

interesting insights...

☒ all ☐ ☐

TITLE: Australia's Petroleum

AUTHOR: chenxi chao ee xin

DATE: 24/09/2024

SHEET: 5

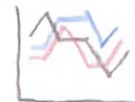

TASK: magazine style

OPERATION

1. hovering over a state in the map will show information/insights

2. hovering over a line will highlight the hovered on line for emphasis

3. hovering over a dot will show information

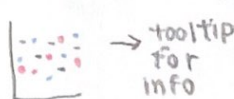

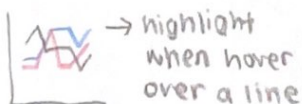

4. allow filter of petroleum types so users can focus on a particular / few types of petroleum

FOCUS

all graphs are important, map most important

all graphs are accompanied with detailed description

provide filter to give focus to the fuel type interested

DETAILS

steps: data cleaning, visualisation, layout

dependencies: vega editor, java, html, css

estimated time & effort: 1 week (research, plan, layout, visualisation)

specific requirements: laptop
